

# CORNERHOUSE DENTAL CARE

## **WE ARE STAYING OPEN**

Dear Patients,

We just wanted to send you a quick update regarding the second lock down which started on 5/11/20.

We will be staying open for emergencies and for those patients who wish to still see the hygienist and come for routine examinations too.

However, we would ask that patients who were previously in a shielded group to refrain from coming to the surgery unless they have an emergency. We are also happy to triage patients and this can be arranged.

We can still only run limited clinics as only one clinician can work per day and so our phone lines are really busy. We ask that you be patient if you cannot get through or leave a clear message so we can call you back.

Finally, we want to reassure that we are happy that our Covid 19 measures are robust and safe for all. Patients and staff alike.

We ask you all to play your part and remember:

**HANDS-FACE-SPACE**

Our best wishes,

Dr's Neeta and Ketan Patel and our wonderful team.
